## Manually Operated Console Minivalves

Cv = .06

3/2 and 5/3-way  
Ports M5 (10-32 UNF)  
Cartridge  $\varnothing$  4 mm (5/32" O.D.)

The manually operated console valves come standard with a 22 mm diameter mounting aperture which consists of our own valves combined with manual devices. This feature means that all the manual devices, 22 in diameter, can be used. This series of miniature valves has been specially designed to satisfy all the application requirements of the controls industry, with particular attention being paid to the operating characteristics which are required from these components:

- Low actuating force=6N (1.35 lbs.)
- Short operational stroke
- Small dimensions
- Speed and accuracy of signal
- Reduced air consumption

The versatility of the manual range is expandable. It is possible to mount an electrical switch next to the miniature valve. In this case, the base piece Mod. 220-000 is required.

Note: Several additional push buttons, switches, lighted operators and electrical controls are available which integrate into this product line. Contact factory for details, lead time and part number codes.
