ATEX - General Information

EX versions of the many of the standard BERNSTEIN switches with ATEX approval are also available for applications involving potentially gas and dust explosive atmospheres.

Approvals for gas "ii G" in accordance with DIN EN 60079-XX

Approvals for dust "ii D" in accordance with DIN EN 61241-XX

Make use of our Ex protection expertise for your applications.

What is ATEX?

ATEX = Atmosphère explosive. The European Directive 94/4/EC governs the production and the circulation of devices and components for explosive atmospheres in the European Union. The IEC Standards harmonized throughout the EU stipulate that ATEX products approved by a certification authority can be used anywhere throughout the EU.

In most aspects the certification authorities of non-European countries such as North America, Russia etc. closely follow ATEXrelevant standards so that various approvals can be acquired worldwide based on an ATEX approval. Corresponding national approvals are available on request.

Where are devices with ATEX approval used?

The fields of application for Ex-protected switches include mixing and processing machines in bakeries (flour dust explosion), processing machines in the food industry where spices are mixed (spice dust explosion), sewer manholes, pump stations and sewage treatment plant (explosive gases "fermentation/digester gas"), waste disposal and recycling industry (various sources of dust and gas explosion), automotive industry and wherever paints and lacquers are used (painting booth) in addition to the classic explosion-hazard branches of industry such as the chemical, petrochemical, pharmaceutical industries as well as the coal, gas and oil-producing and processing industries. Mobile equipment and systems such as vacuum cleaners, stacker lift trucks, fans etc. that are used in the above fields of application must exhibit a corresponding ATEX approval. ATEX products are therefore a part of our everyday lives..

Who is responsible for what in Ex applications?

The device or component manufacturer must obtain a type approval certificate (ATEX approval) for these devices and components. The machine manufacturer can acquire his system approval based on these approvals and the declaration of conformity.

The manufacturer of a machine or system that is used in Ex applications must obtain a corresponding system approval for the machines it markets. The entire system must be taken into consideration both from a mechanical as well as from an electrical aspect.

In accordance with the ATEX Operator Directive 1999/92/EC (ATEX137), the operator of technical facilities shall be responsible for avoiding or restricting the formation of explosive atmospheres (primary explosion protection), avoiding effective ignition sources (secondary or design explosion protection) and restricting the effect of an explosion to a safe level (tertiary explosion protection).An explosion protection document describing the implemented measures and hazard assessments is to be compiled.

In addition to foot switches and cable pull switches, our current ATEX-certified product range also includes various standard limit switches, limit switches and miniature limit switches.

Customer-specific individual approvals or approvals for switches and components from the BERNSTEIN range not yet certified are available on request.

ATEX

Terminal boxes and empty enclosures

Only materials that correspond to the temperature range T6 required for Ex enclosures are used in these enclosures and components. The minimum type of protection rating of all enclosures and screw connections is IP 64, other protection classes available on request. The latching devices on the enclosures are available as captive screw connections. Various CA versions are available with flange plates. All built-in components must conform to the relevant approvals.

Momentary contact, cable pull and foot switches

An Ex d-certified switching element lies at the core of these Ex-approved switches. It is mounted in the switch enclosures. The mechanical actuator and its installation are certified separately.

The approval of additional actuators and switch enclosures from other series is possible on request.

All switches and momentary contact switches feature one NO contact and one NC contact.

Magnetic switches, Namur sensors

The protection against flammable energies is realised by encapsulation. The magnetic switches and Namur sensors are fitted at the factory with up to 7 m long connection cable. The cable is permanently connected to the enclosure and is part of the approval.

All sensors are certified for a maximum ambient temperature of +60 °C.

ATEX-approved products for potentially explosive atmospheres

- Ex e, Ex ia and Ex e/ia terminal boxes made from polyester and aluminium
- Ex d limit switches, rope pull switches and foot switches
- Ex mb/Ex tD magnetic switches

Aluminium and Polyester Blank enclosures CA, CP, CPS

ATEX-U certified standard enclosures

BERNSTEIN CA enclosures have been tested by an internationally recognised and certified inspection authority and certified through type approval testing for use in areas with potentially explosive dust and gas atmospheres. Used as terminal and control enclosures, the aluminium pressure die-cast and glass-fibre reinforced polyester enclosures are designed to accept corresponding mechanical and electrical equipment. The enclosures come with operating instructions, type identification plate, EU Type Approval Certificate and CE Declaration of Conformity. Either an EPDM or silicone seal can be used. The enclosures can be fitted at the factory with external hinges.

Aluminium and polyester terminal enclosures

The ATEX standard housings of the CA and CP series are designed as fully machined and assembled connection and wiring housings for use in **zones 1, 2 and 22**. They are machined and assembled according to the customer's needs and wishes. A combination of terminals and cable glands of various manufacturers is possible.

All common connecting terminals and cable glands can be combined.

- Screw terminals
- Direct push in terminals
- Wire piercing clamps
- Quick connect push terminals
- Single screw-type metal or plastic glands
- Multiple screw-type metal or plastic glands
- Special screw type glands for ribbon cables

The housings are designed in **enhanced safety and intrinsic safety protection** types or a combination of both.

A protection type up to IP 66 in accordance with ISO 60529 is possible depending on the seal. The operating temperature ranges from -55 °C to +80 °C depending on the version.

All sizes of the empty housings are available as **assembled** housings. Either an earthing rail or an earthing clamp is used as an earth connection.

Accessories

Cable gland, plastic M12-M	63	
e 9 🕲	Serie ECDEP (Standard)	 -20 °C to +80 °C, PA6 IP 66/68, Ex e and Ex i
Cable glands, metal M12-M	63	
	Serie EURO-Top X (Standard)	● −20 °C to +80 °C, MS ● IP 66/68, Ex e
Screw terminals		
	TS15 (Standard) TS35 (Standard)	 MBK 2,5 / AKZ 2,5 UT 2,5 / WDU 2,5
Mounting plates		
	galvanised steel laminated paper	 as from CP-370/CA up to CP-320
External mounting bracket	S	
	for mounting without opening the covers	stainless steal
Mounting rails		
	TS-35 TS-15	 as from CA-210/CP-220 up to CA-190/CP-195
Earthing bars		
Constanting of the second s	as option to PE terminals	 solid CU earthing as from CA-210/CP-220

Monitor housings for zone 2/22

To enable the use of controllers and operating units in explosive areas of **zones 2 and 22**, monitor and controller housings of the CC-4000 series, CC-800 series and the CA and CP series with customised assemblies can be used.

Zone 22

For operation in **zone 22** (Dust 3D) the housings are designed to ensure explosion protection type tc (pro-tection by housing). The basic preconditions for this are:

- Enclosure and suspension system protection class IP 6x
- All add-on parts with type examination certificates or rather CE declaration of conformity for zone 22
- Max. permissible surface temperature +80 °C
- The assembly of all externally accessible parts at BERNSTEIN AG
- Issuing of a manufacturer declaration / CE declaration of conformity for the complete housing by BERNSTEIN AG
- Documentation and monitored production by ATEX-QA

Zone 2

For operation in **zone 2** (Gas 3G) the housings are designed to ensure explosion protection type Ex nA (non-sparking device) and/or Ex i (intrinsic safety). The basic preconditions for this are:

- Enclosure and suspension system protection class min. IP 54
- All add-on and built-in parts with type examination certificates or CE declaration of conformity for zone 2

Sensors for potentially explosive atmospheres

BERNSTEIN offers a wide range of sensors for monitoring and controlling machines in areas with a risk of explosion. They include magnetic switches with reed contact, inductive NAMUR sensors and inductive sensors with switching output. The range of BERNSTEIN include many designs and sizes.

Technical Data Magnetic Switches

- Operating voltage range max. 250 V DC
- Output current max. 1 A
- Ambient temperature –20 °C to +60 °C
- Protection class IP 66
- Cable 3 x 0,75 mm²
- Red, PA enclosure
- Suitable for zones 1, 2, 21, 22 (2G/2D)

Technical Data NAMUR Sensors

- Operating voltage range max. 30 V DC
- NAMUR output
- Ambient temperature –25 °C to +60 °C
- Protection class IP 67
- Cable from 2 x 0,14 mm² up to 2 x 0,5 mm²
- Metal enclosure from M5 up to M30
- Suitable for zones 2, 22 (3G/3D)

Technical Data Inductive Sensors

- Operating voltage range 10–25 V DC
- Output current < 200 mA</p>
- PNP switching output
- Ambient temperature –25 °C to +70 °C
- Protection class IP 67
- Cable connection
- Metal enclosure from M12 up to M30
- Suitable for zones 2, 22 (3G/3D)

Electromechanical Switches for potentially explosive atmospheres

An Ex d-certified snap-action switch lies at the core of the Ex-approved switches. This switch with protection class **flameproof encapsulation** can be used in **zones 1 and 2**.

The snap-action switch has two galvanically isolated contacts, one NC contact and one NO contact. It is designed for use as a mechanically protected built-in switch in housings, control and monitoring devices. It is available with different actuators for this purpose.

The switch insert is also used in various switch housings with different actuating devices.

For potentially explosive atmospheres, BERNSTEIN proposes the **ENM2** and **GC** series as position switches, the **F** series as foot switches and the **SD** series as rope pull switches.

However, the **SI2** and **SN3** series as rope pull switches and belt alignment switches are also possible for the use in **zones 21 and 22**.

Technical Data EEX-SU1Z

- Certification Ex II 2G Ex d IIC T6
- Rated insulation voltage 250 V
- Rated operating voltage 230 V AC
- Conventional thermal current 5 A
- Utilization category / switching capacity AC 15 240 V / 3 A DC 13 250 V / 0,27 A
- Mechanical switching frequency max. 120/min.

- Mechanical service life 2 x10⁶ switching cycles
- 1 NC/1 NO
- B10d: 4 million
- Suitable for **zones 1, 2 (2G)**
- Admissible ambient temperature –20 °C to +60 °C
- Protection class IP 66 according to IEC 60529
- PEI enclosure

Position Switch series ENM2 and GC, Rope Pull Switch SD

Types ENM2 and GC

- Standard switch conforming to DIN EN 50041
- Standard actuator conforming to DIN EN 50041, Type A, B, C, D
- Protection class IP 66 to VDE 0470 T1
- Aluminium pressure die-casting enclosure
- Sheet aluminium cover
- Actuator can be repositioned by 4 x 90°
- Cable entry M20 x 1.5
- Metal actuators for high loads

Technical Data ENM2, GC and SD

- Identification Ex II 2G Ex d IIC T6
- Rated insulation voltage 250 V
- Rated operating voltage 230 V AC
- Conventional thermal current 5 A
- Utilization category / switching capacity: AC 15 240 V / 3 A DC 13 250 V / 0,27 A
- Mechanical switching frequency max. 50/min.

- Mechanical service life 2 x10⁶ switching cycles
- 1 NC/1 NO
- B10d: 4 million
- Suitable for zones 1, 2 (2G)
- Admissible ambient temperature –20 °C to +60 °C
- Protection class IP 66 according to IEC 60529
- Aluminium pressure die-casting enclosure

Foot Switch series F, Rope Pull Switch and Belt Alignment Switch series SI2

Belt alignment switch

In conveyor belt applications, the safety switch prevents conveyor belts from being damaged or being destroyed as the result of the belt running off track. When the roller lever is deflected by a conveyor belt running off track the safety contacts in the switch engage, thus shutting down the conveyor belt.

Only after eliminating the cause of the malfunction can the system be restarted by means of the pull release (key ring).

Rope pull switch

BERNSTEIN double-spanned cable pull switches Si2 are also used in emergency stop applications. When the cable is pulled the switching lever is deflected in the corresponding direction and the system shut down. These rope pull switches can be used in applications with high temperature fluctuations and long cable spans. With their sturdy enclosure, these switches are perfect for harsh environments. Two cables spanned in opposite directions are attached to the switching device. The counter springs are secured to the wall at the ends of the cables. Provided the change in temperature is the same at all points along the cable, the springs will effectively compensate for the change in cable length.

Footswitch

BERNSTEIN offers you a wide range of foot switches to meet exacting requirements in industrial applications. They can be optionally equipped with an aluminium cover panel or a protective hood (UN) and have the protection class IP 66. The ambient temperature can reach from -30 °C up to +60 °C. The mounting holes make it possible to anchor the foot switch to the floor. Each foot switch is equipped with four rubber feet to prevent it slipping. The separators on multi-pedal foot switches prevent several pedals being inadvertently operated simultaneously (version without separators available on request). Type F1-F3 foot pedals are made from a thermoplastic material.
