

Service Entrance Water - Tight Connectors for Underground Feeder Cable

American Fittings top of the line service entrance offering is a Type UF Connector designed to connect underground feeder cables to meter boxes or enclosures. This rugged steel connector provides a liquid tight connection for the life of the installation.

- To protect against corrosion, a threaded tapered steel body and nut is furnished with a brilliant electro zinc chromate plating.
- A steel retaining ring safeguards the cable jacket from abrasion and reduces the torque effort required to install.
- Complete with a neoprene bushing designed to withstand oil and water, and provide a superior gripping surface.

U.F. (Underground Feeder Cable) Connectors *Compression Type*

- Connects underground feeder cables to a box or enclosure
- Neoprene bushing resists oil and water
- Taper pipe thread
